

Serial No. 09/855,180

Docket No.: KCC-14,485

B2

sub 1. (Twice Amended) A garment having at least one opening for a body part, the garment comprising:

at least one material defining the opening and extending away from the opening; and

a fluid sealing gasket integral with the material and in the vicinity of the opening;

the material including at least one high tension zone defining the fluid sealing gasket, and at least one low tension zone away from the gasket;

the at least one high tension zone including a plurality of elastomeric first filaments, and the at least one low tension zone including a plurality of elastomeric second filaments, the material further comprising a barrier layer between at least two of the elastomeric second filaments;

wherein the fluid sealing gasket interfaces with the body part during use to resist fluid transfer across the gasket.

B3

25. (Twice Amended) A garment having at least one opening for a body part, the garment comprising:

at least one material defining the opening and extending away from the opening; and

a fluid sealing gasket integral with the material and in the vicinity of the opening;

the material including at least one low stretch zone defining the fluid sealing gasket, and at least one high stretch zone away from the gasket;

the at least one high stretch zone including a plurality of elastomeric first filaments, and the at least one low stretch zone including a plurality of elastomeric second filaments, the material further comprising a barrier layer between at least two of the elastomeric second filaments;

wherein the fluid sealing gasket interfaces with the body part during use to resist fluid transfer across the gasket.
